

Open Letters to the Government

Open Letter

To the Australian State of New South Wales (NSW) Premier and Ministers for Industry and Trade, Finance and Small Business, Customer Service, and Better Regulation and Innovation,

Consumer Product Safety

ALDI Australia sells beer products in good and poor packaging. Rivet is sealed strongly with glue and Saint Etienne is sealed securely with plastic but Natural Blonde is sealed in and around poor cardboard packaging sometimes already broken on the shelf also made available at eye height which is risky to handle for fragile-packaged products. A Suggestion for Improvement is better Sealing of Beer Products, as Leading New/VB is already, is Introduced as Measure and Standard by NSW Government to Mitigate Risk of Purchasing Accidents and Store Cost-benefit Shrinkage Write-offs where Packaging is not already Satisfactory.

Open Letter

To the Australian State of New South Wales (NSW) Premier and Ministers for Industry and Trade, Finance and Small Business, Customer Service, and Better Regulation and Innovation,

Consumer Product Prices

Australian tobacco prices should be restored to reasonability. Australian tobacco prices have more than quadrupled in a decade. Tobacco smoking used to be a poor man's luxury but token luxury has been cherooted to the hilt by the Health and Wealth Pomp of Government Ignorant of Actual Toxicity which they Fob off as Vague Flavour Limitations. Australia set tobacco precedents to bag it to the bottom of the barrel for prices and consumption taboos. Mannatech Glyconutrient Real Food Supplement Ambrotose Antioxidant (AO) is Targeted to Support Tobacco Smoker Health. American Indians Smoke the Peace Pipe to a ripe old age.

Open Letter

To the Australian State of New South Wales (NSW) Premier and Ministers for Industry and Trade, Finance and Small Business, Customer Service, and Better Regulation and Innovation,

Consumers or Addictions

Australia treats Drug and Alcohol as mere Fob off and Cop out. Australia provides Drug and Alcohol Counselling which Categorises Illicit Substances and Tobacco as Drugs and Alcohol as Alcohol. Illicit Substances are Illegal because of the Damaging Impact they Cause to the Brain and Body but Forming Use Centres is a Contradictory and Cop out. Australian Consumption of Legal Drug and Alcohol Substances is Price Extortion and Exploitation as Culture and Cryptology or perhaps Sorcery of Consumers can be Unsafe Compared to Counterparts, and, on the other hand, Industry Disbelief and Death of Pharmaceuticals is Pharmakeia!
